Summary

Cybersecurity-focused M.Sc. Computer Science student targeting DevSecOps roles, with hands-on experience in secure software development, SIEM pipeline design, and containerized security labs. Interested in building secure CI/CD workflows and cloud-native security practices.

Education

University of Catania — Catania, IT
M.Sc. Computer Science – Cybersecurity & Cloud Systems (LM-18) — *Oct. 2025 – Jun. 2027 (expected)*

Projects

Java SIEM | *Java, Spring Boot, RabbitMQ, Docker*

- Designed and implemented a modular SIEM from scratch, applying object-oriented design patterns for maintainable security services.
- Built an event-driven ingestion pipeline with RabbitMQ and deployed all components through Docker Compose.
- Structured the architecture for extensibility, enabling integration of new log sources and detection rules.

CTF Thesis Challenges | *Docker, Python, Web Security, Cryptography*

- Designed and delivered three fully containerized CTF labs as part of a master's thesis project.
- Developed realistic offensive scenarios including WAF bypass, JWT key substitution, and fuzzing-driven reconnaissance.
- Automated reproducible lab environments with Docker, supporting repeatable security testing workflows.
- Documented exploitation paths and remediation insights to align offensive findings with defensive improvement.

Technical Skills

Programming: Python, Java, C, C++, JavaScript, Go (learning)
Security: Burp Suite, Wireshark, OWASP Testing Methodology, JWT exploitation techniques, SIEM fundamentals
DevOps & Cloud: Docker, Git/GitHub, Kubernetes (learning), CI/CD fundamentals (GitHub Actions)
Core Concepts: DevSecOps, Cloud Security, Secure SDLC, Penetration Testing, Cryptographic Protocols
Operating Systems: Arch Linux, Debian-based distributions, Windows

Certifications

Cybersecurity Fundamentals | *IBM (Credly Verified)* — 2025
Intro to Bug Bounty Hunting & Web Application Hacking | *Udemy* — 2025
Recon for Bug Bounty, Penetration Testers & Ethical Hackers | *Udemy* — 2025
Qiskit Fall Fest | *IBM – University of Catania* — Nov. 2024

Languages

Italian: Native **English**: B2
